

Focus on
**London-based Jersey Corporate,
Funds and Banking offering**

Jersey structures are used globally by leading financial services and asset management companies and for almost 20 years our London office has been a key platform for our Jersey corporate, banking and funds law offering.

While our global teams are active in the City throughout the year, we have the largest Jersey-law focused corporate and financial services law team in the City of any offshore law firm, and we pride ourselves on being easily accessible and readily available to London-based clients and intermediaries.

Our London corporate and financial services law team is led by partners with more than 30 years' experience in corporate real estate, mainstream corporate, finance and funds law gained in offshore, onshore and in-house roles, supported on the ground by experienced associates, and by our wide London-based team focused on litigation and private client matters.

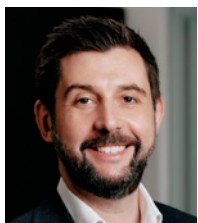

Our London team is fully integrated with our Jersey-based financial services group led by five experienced partners supported by ten counsel and associates.
