Venture Capital services

Our specialist legal teams work with onshore counsel to structure Venture Capital investments, primarily using Cayman Islands vehicles to facilitate investment into US and global start-ups, or to facilitate investment by US and global investors.

We have experience of advising on all sides of these matters – supporting start-ups on their legal structuring and on successive funding rounds; advising funds on their investments into start-ups (as well as in connection with their own fund formation); and advising investors as independent counsel.

We also advise on exits by IPO or merger, and on related employment benefit structures and private wealth structuring for founders.

Our team has experience of onshore and offshore practice in this area, and we are able to advise on our jurisdictions' evolving legal and regulatory framework, adding regional expertise and market insight from our Asian, European and Caribbean practices.
